About the Conference

In an age where digital technologies are transforming the way we live, work, and connect, this gathering represents a critical juncture for discussing how digital public infrastructure can be harnessed to drive sustainable development. In a world grappling with an array of complex challenges, from climate change and economic inequality to healthcare disparities and educational gaps, the role of digital public infrastructure cannot be underestimated. The 'National Conference on Digital Public Infrastructure and Sustainable Development' serves as a pivotal platform for the convergence of ideas, strategies, and insights at the intersection of digital transformation and sustainable development. This conference aims to explore the profound impact of Digital Public Infrastructure (DPI) on advancing the United Nations' Sustainable Development Goals (SDGs) and this was also the main theme of G20 Summit 2023 India. Attendees will delve into discussions on how DPI enhances access to information, promotes digital inclusion, fosters innovation, and empowers societies to address social, economic, and environmental challenges. The event underscores the critical role of DPI in driving economic growth, environmental sustainability, and social equity. Through collaborative dialogues, this conference endeavors to catalyze sustainable development initiatives powered by digital solutions, emphasizing the significance of global cooperation and partnership

Participants will discuss a policy framework for integrating digital public infrastructure to support sustainable development goals. The conference will showcase cutting-edge technological innovations, emphasizing their role in fostering sustainability. Emphasis will be on public-private partnerships for collaborative implementation, involving government entities and private enterprises.

Conference aims to foster

- Policy Framework Development
- Public-Private Partnership
- Capacity Buildings Initiatives
- Data Governance and Security
